

Looking for an Industrial Design Lead

Mimetik is a startup working on providing seamless interactions with millions of devices. Our technology allows to precisely track hand motion in real time with negative latency. An AI-supported processing of the motion data and environmental information will give human-like perception to machines. No more need for a keyboard, mouse, joystick, or tablet. Seamlessly embedded in a textile glove the Mimetik solution does not interfere with the work process, but guides the user through intuitive feedback.

As the Industrial Design Lead, you will be at the core of the hardware and interface development always keeping the user in focus. You will have a strong team of developers and engineers helping you to realize ideas. With your experience in launching market ready products you will shape the Mimetik product portfolio from the development stage, up until the production line and into the hands of the customer. Your abilities to communicate and visualise will support the seamless exchange within the team and between stakeholders. Mimetik offers you the possibility to bring in your creative strengths in order to shape the future of human-machine interaction.

What is waiting for you:

- You are leading the design team responsible for the external appearance of Mimetik. This includes a wide range of items from pitch deck presentation to trade fair booth design, video production and products. As a strong team player you work side by side with world-class engineers in a fast growing team.
- You have access to experimental playgrounds, including human collaborative robots such as Franka Emika Panda Robot, Boston Dynamics Spot Dog, robotic hands, VR/AR test environment/games.
- You are part of a highly dynamic international environment and get outstanding chances of a quick career growth.
- You join a mission-driven team working on ground-breaking technological innovations that save, improve, and bring joy to the life of millions of people. By joining the company at this early stage, your contributions will be highly appreciated!

What we are looking for:

- A strong curiosity in building new innovative products and learning new things every day. Challenges would not stop you and for you there is no such thing as impossible.
- Ability to think outside your field of expertise and taking the entire business and market requirements into account. You are excellent in selling your work to the company management and explaining the details to your colleagues.
- As an industrial designer you prepare decisions for the board regarding the product development pointing out different variants and solutions.
- You have 3+ years of experience in launching market-ready products as well as in project management organising and plan the product design process, coordinating the resources of your group and external agencies
- Applicability of your design process know-how and expertise in production of hardware products. You have completed several projects requiring a deep understanding of the target group, design methods for different occasions and stakeholders.
- A strong skillset in common 2D and 3D design software as well as in building prototypes and demonstrators.
- Proficiency in textile and wearables is most welcomed. However, to be experienced in coordinating external production partners will work as well.
- A willingness to explore the benefits of an international team. In best case, you have an education/work experience abroad. Your English skills allow you to feel comfortable both at a work desk and in a pub and you will profit from knowing German, Russian, Turkish, Vietnamese, and Hungarian. You are welcome to join us and enrich our palette!

Please send us your application including your portfolio till **May 7th** to info@mimetik.de.
